

The Portuguese Water Dog Club of Canada

Breeder Litter Due Form 2018

Effective January 1, 2015, the Breeders' list was being discontinued. However, Breeders are welcome to post their available puppies on the PWDC website. To be eligible to post a litter, a breeder must be a member in good standing of the PWDC for at least one year. When a bitch is owned by two or more breeders, all breeders have to be members of the PWDC in good standing. The exception to this rule is if the co-breeder is a resident of the United States or other international location.

The cost per listing is \$20.00. There is no restriction on the number of listings per breeder per calendar year. All funds generated will support PWDC Rescue.

When you have a litter due, 4 weeks in advance of the whelping date, send in your form to Deirdre Hall with supporting health documents on the sire and dam or indicate on the form if the health testing on the sire and dam is current in the PWD Health and Litter database (www.pwdhld.com). Deirdre will post the litter information on the club website after she has verified the data is current. The listing will stay up for 12 weeks in total. The listing will consist of breeder contact information, including a link to your website and email, name of sire and dam and all supporting health testing.

Health testing required

Individual testing for both sire and dam:

Optigen prcd-PRA with at least one parent testing normal (non-carrier)

Current passing ECR (formerly CERF)

Final OFA Hips certification rating Excellent, Good or Fair, or FCI Hips rating A, B, or C, or

OVC certification Normal hips

Individual testing Normal for either sire or dam:

GM-1

IC13

JDCM

Optional:

OFA Elbows

AKC DNA

OFA CHIC Certificate Clear by Parentage Testing (for one generation only) for:

Optigen prcd-PRA

GM-1

JDCM

indicating Normal

Links to testing websites and forms can be found at www.pwdcc.org/PWDCC/index.php/health

If the sire or dam is not OFA tested, documentation must accompany this form to certify that hips are clear from dysplasia.

If breeders wish to post a litter from a sire who is deceased and or using frozen semen, documentation must be provided according to the rules and regulations for health testing requirements at the time the semen was frozen. If the sire is from Europe or other international location, excluding the United States, it is not required that the sire be registered in the Health and Litter Log but health testing documentation must be provided in order to post the litter. The dam however, must be registered in the database.

Breeder/submitter (co-breeders please supply the same information on the back of this form)		
Kennel name (reg) or (perm reg) as per CKC registration
