

# The Portuguese Water Dog Club of Canada

## Breeder Litter Due Form 2025

The Breeders' list is now open for registration, see <https://pwdcc.org/about-pwds/breed-standard/new-puppy/pwdcc-breeder-members>. Breeders can opt to participate on the Breeder List and must list their litters on the PWDC website. Or list their litters but opt not to be on the Breeder' list. To be eligible to post a litter, a breeder must be a member in good standing of the PWDC for at least one year. When a bitch is owned by two or more breeders, all breeders have to be members of the PWDC in good standing. The exception to this rule is if the co-breeder is a resident of the United States or other international location.

The cost per listing is \$20.00. There is no restriction on the number of listings per breeder per calendar year. All funds generated support PWDC Rescue. Send your form to [treasurer@pwdcc.org](mailto:treasurer@pwdcc.org), and payment by etransfer (preferred), credit card or Paypal, cheques made out to Portuguese Water Dog Club of Canada, indicating Litter Posting and date.

When you have a litter due, send in your form to Deirdre Hall, [deirdre@pwdcc.org](mailto:deirdre@pwdcc.org), with supporting health documents on the sire and dam or indicate on the form if the health testing on the sire and dam is current in the PWDC database or ofa.org. Deirdre will post the litter information on the club website after she has verified the data is current. The listing will stay up for 16 weeks in total. The listing will consist of breeder contact information, including a link to your website and email, name of sire and dam and all supporting health testing.

### Health testing required

#### Individual testing for both sire and dam:

Current passing CAER (formerly CERF)

Final OFA Hips certification rating Excellent, Good or Fair, or FCI Hips rating A, B, or C, or

OVC certification Normal hips

Individual testing Normal for either sire or dam: with at least one parent testing normal (non-carrier)

Optimal Selection or Optigen prcd-PRA, GM-1, IC-13, JDCM, EOPRA, Microphthalmia

#### Optional:

OFA Elbows

AKC DNA

#### OFA CHIC Certificate Clear by Parentage Testing (for one generation only) for:

prcd-PRA, GM-1, IC-13, JDCM, EOPRA, Microphthalmia

indicating Normal

Links to testing websites and forms can be found at [www.pwdcc.org/PWDCC/index.php/health](http://www.pwdcc.org/PWDCC/index.php/health)

If the sire or dam is not OFA tested, documentation must accompany this form to certify that hips are clear from dysplasia.

If breeders wish to post a litter from a sire who is deceased and or using frozen semen, documentation must be provided according to the rules and regulations for health testing requirements at the time the semen was frozen. If the sire is from Europe or other international location, excluding the United States, it is not required that the sire be registered in the PWDC or ofa database but health testing documentation must be provided in order to post the litter. The dam however, must be registered in the database.

<b>Breeder/submitter</b> (co-breeders please supply the same information on the back of this form)
